Paul L. Reed
Ext. 8208

May 18, 2015

The Salem County Clerk's office has assembled *"The Churches of Salem County"* which is a collection of the history of different churches in Salem County. This booklet contains over 100 pages of history about the beginnings and continuation of over 50 religious organizations located here in Salem County.

Salem County was founded in the late 1600's by people with a very strong religious background. This is what has made Salem County what it is today. Over the years religion in Salem County has blossomed and we have hundreds of churches from many different denominations. This book contains just a few of those. If you would like to include the history from your church, please feel free to submit that information to our office at the above address. We would like to update this publication each year around Easter.

The History of Salem County is very important to our office. Many people research their personal history and when there is information such as this available to the public it makes it just that much easier for them, but we can not do this without your input. This is another way to document your church and the impact it has had in Salem County. Thank you for your interest in this historical project.

Sincerely yours,

Gilda T Gill
Salem County Clerk
